

Passage Program Upskill Initiative

Upskill Your Cybersecurity Team

Most organizations find it increasingly difficult to develop newly hired talent and retain tenured personnel. Investing in the professional development of cybersecurity personnel is a key factor in both the operational success and the long-term retention of staff. If you are managing your own in-house security team or selling to customers with security practices, you can rely on the expertise of the Passage Program to provide job-readiness training and assessments for qualified employees.

Organizations who use the Upskill Initiative can:

- Gain confidence in the expertise of the Passage Program team to deliver and facilitate job-readiness training
- Easily access training for employees that meet the program's minimum criteria
- Utilize the Upskill Initiative as a professional service to support the cybersecurity development needs of customers

Ready to leverage the Passage Program?

The Upskill Initiative provides the bandwidth and proficiency needed to support the development of today's cybersecurity professionals.

60% Have difficulty retaining cybersecurity staff

73% Consider hands-on experience top factor in staff qualification
